## Technology highlights at Indurent Park Gloucester – Stonehouse Road. Unit 14A

Multiple fiber internet providers

Real-time energy monitoring

On-site EV charging

Back-up power solution

WiredScore  
PLATINUM

1 of 12 WiredScore Platinum buildings in  
Gloucester

## The experience at Indurent Park Gloucester – Stonehouse Road. Unit 14A

| Outcome                                                                                                       | What this means for you                                                                                                     |
|---------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
|  Internet Service Provision | Exceptional connectivity performance delivers continuous, high-speed access for mission-critical, data-driven operations.   |
|  Mobile Performance         | Mobile coverage within the building supports dependable, high-quality communication across key areas.                       |
|  Sustainability Technology  | Access to sustainability-focused features that support responsible energy use and operational efficiency.                   |
|  Infrastructure Setup       | High-performing infrastructure provide flexible capacity and lasting resilience for advanced operational needs.             |
|  Technology Resiliency      | Mission-critical infrastructure guarantees uninterrupted performance, advanced redundancy, and total operational assurance. |
|  Future Readiness           | Built-in adaptability and flexibility empowers occupiers to innovate and evolve without constraints.                        |

 Sustainability Technology

- Energy and water utilisation data provide resource insights to cut consumption and operating costs.
- EV charging stations integrated with a demand-response management ensure optimised energy usage

 Infrastructure Setup

- Multiple points of entry with capacity and universal communications chamber enable faster service installation and improve intake resilience.
- Dedicated vertical and horizontal pathways run building-wide and enable routes for rapid installs and future upgrades.
- Designated telecommunication space ensures telecoms equipment is well organised

 Technology Resiliency

- Lockable telecommunications space and secured telecommunications pathways protect critical equipment and ensure uninterrupted connectivity.
- Air conditioning and active ventilation in the telecommunications space maintain stable environments and safeguard reliable equipment performance.
- Above floodplain siting prevent water damage and secure operational continuity.
- On-site generation and centralised power storage solution maintain power during outages and reduce downtime risk.

### **Future Readiness**

- Reserved and dedicated rack installation ensures capacity for tenant equipment upgrades and expansion.
- Dedicated rooftop installation space with cable pathway supports efficient deployment of wireless connectivity solutions.
- Fiber backbone installation shortens fit-out times and supports high-bandwidth, reliable performance.

## What is WiredScore?

---

WiredScore certification is the global standard for digital connectivity, recognizing and promoting best-in-class digitally connected buildings across the globe. Being certified by WiredScore demonstrates the building has gone through rigorous 3rd party verification.

**7500+**

certified buildings

**9m+**

people in WiredScore  
certified buildings

**1.5bn+**

certified square feet
